FLORIDA KEYS

Fun Facts

North America's **only living coral reef** ecosystem is located just a few miles off shore of the FI Keys.

The average **temperature** is 80 degrees.

Lionfish is an unwelcomed visitor to the **Florida Keys** and can devastate fish populations but, you can order them at some restaurants.

There are over **1700 islands** in the Florida archipelago however few of these are populated and most are very small.

The **7 Mile Bridge** is not 7 miles long its 6.765 miles.

There are **42 Bridges** that connect the mainland to Key West; the longest is the 7 mile bridge.

The **Atlantic Ocean** is on the South east side of the Keys and the **Florida Bay** and **Gulf of Mexico** are on the Northwest side.

Loggerheads are the most common turtles in the Florida Keys.

The word "**Key**" comes from the spanish word "Cayo" meaning "**Little Island**"

Key West has more bars and churches per capita than any other place in the country.

Watch out for our **Key Deer** mostly found on **Big Pine Key**.

Mile Markers are small green and white signs on the side of the road that help you to get around. They start in Key Largo at mile marker 126 and go all the way to Mile Marker 0 in Key West.
